

# **PANDEMIC**

## **WHAT WE SHOULD DO**

1. Develop procedures for securing building, protecting stored supplies, and restricting access to campus.
2. Safety and Security can coordinate with Lock-Up personnel to ensure that buildings are secure.
3. Public access to BW must be restricted (this can be difficult due to the spread out nature of the campus).
4. Signs must be made to put the public on notice that there is no trespassing during the Pandemic.
5. Safety and Security Officers can enforce the policy on a case-by-case basis, by confronting individuals that appear out of place.
6. Ongoing communication will be established with local police, fire, and emergency response personnel in order to coordinate efforts by managing safety issues.
7. Develop triage protocols for responding to students in distress either due to illness or illness of others or requesting transport for medical care.
8. Add a second dispatcher to handle the number of calls coming into dispatch. Officers could also work 12 hour shifts to increase the number of Officers on the road.
9. Establish a communication plan with student health and counseling services, residence life, and student affairs for reporting calls and transports.
10. It may be necessary to use campus vans as additional Safety and Security vehicles for transporting.
